

Cancer Research in 2020: We are good at “zooming in”, poor at “zooming out”

“Thanks to state-of-the-art molecular biology, we now have a clear picture of what p53 does to metastasis!”

“Thanks to state-of-the-art bioinformatics, we now have a clear picture of what p53 does to metastasis!”

Technology-driven research lets us dig deeper into details. Not much progress then in 2020. We require theory-driven research, developing abstract, small/simple models supporting the falsification of hypotheses about cancer.
